Uphill section Per up-hill section an additional water quantity of 370-400m³/h is required		✓
Acrylic sections		straight & curves

WIEGAND.WATERRIDES GMBH

DOUBLE RACER RAFT

Which team is faster? The head-to-head race starts with the acceleration slope.
This raft slide for two riders can be delivered in stainless steel, FRP or as a combination of the two with an uphill section. We are more than happy to adapt the system to suit your specific needs and wishes. The Race Guide System increases the competitive race feeling using individual light systems. If your team is in the lead, your racetrack lights up green. If you are chasing it lights up red, this is made possible by our patented Race Guide System using high power sensors.

All values are guidelines – changes may occur after planning and approval by technical services
