WIEGAND.WATERRIDES GMBH

2IN1 RACER

Two slide lanes in an open or closed FRP form. The opponents initially slide side-by-side, then change sides through two separate tube slides, which immediately afterwards lead back into an open double slide.

The system can be adapted to your desired specifications at any time and supplemented with acrylic segments. Light and sound effects make this competitive slide even more appealing. Great fun for young and old.

FRP	✓
V4A	✗
Capacity (theoretical, maximum)/h	2 x 180/h
Water quantity m³/h	2 x 90 m³/h
Level	easy / moderately difficult
Body slide	✓
Safety systems / time	✓
Safety systems / sensor system	optional
Safety systems / turnstile	✗
Acrylic sections	straight & curves
U-Drop optional	✓
VR slide optional For VR slides we recommend a length of at least 100 m.	✗

All values are guidelines – changes may occur after planning and approval by technical services. All slides can end in an individual shallow water landing pool or in an existing pool. Both solutions are examined on a case-by-case basis
